Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 April 2002.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 23-40 is/are pending in the application.

### DETAILED ACTION

Applicant's arguments filed 4-19-2 have been fully considered but they are not persuasive. The claims remain rejected for the reasons of record.

Applicant's arguments have been considered however a showing to overcome a prima facie case of obviousness must be clear and convincing( In re Lohr et al. 137 USPQ 548) as well as commensurate in scope with the claimed subject matter ( In re Lindner 173 USPQ 356; In re Hyson, 172 USPQ 399 and In re Boesch et al., 205 USPQ 215 (CCPA 1980).

As discussed by applicant, Sasaki teaches using embryonated 9-11 day old eggs and Mitsuhashi teaches using 8 day old embryonated eggs. Thus the use of embryonated eggs which are less than 10 days old is clearly taught by the art. The art teaches that such a substrate is a useful vehicle for growing a variety of viruses therefore the claimed invention would have been obvious at the time the invention was made.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 23-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitsubishi (4659569) and Sasaki et al(JP 59-29831).

Applicant claims an egg infected by a mutated influenza virus.

Mitsubishi and Sasaki teach that embryonated eggs under 10 days old are susceptible to virus infection and replication particularly to influenza viruses. The references clearly disclose eggs infected with viruses, particularly influenza. The references do not teach the specific viral strains which are now claimed however composition of young embryonated eggs infected with the claim designated strains would have been obvious to one of ordinary skill in the art at the time the invention was made because it is notoriously old and well known in the art to propagate viruses in such eggs and one would have been motivated to make the composition because one would reasonably expect the infected egg to yield replicated virus.

As the references clearly indicate that the various proportions and amounts of the ingredients used in the claimed composition are result effective variables, they would be routinely optimized by one of ordinary skill in the art in practicing the invention disclosed by those references.

Applicant would appear to allege criticality with regard to the strain of virus in the composition. However, there is not clear and convincing evidence of criticality now of record. The slight difference in results described in the specification would appear to be no more than a difference of degree rather than a difference in kind. This type of evidence is insufficient to overcome a prima facie case of obviousness.

Accordingly, the claimed invention was prima facie obvious to one of ordinary skill in the art at the time the invention was made especially in the absence of evidence to the contrary.

### *Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

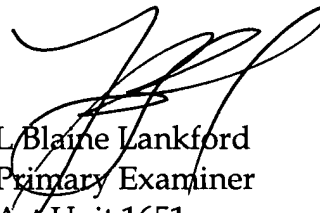

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
